Rangpur, Bangladesh

CAREER OBJECTIVE

A front-end and MERN stack developer with a strong belief in hard work, efficiency, and continuous learning. Quick to adapt to new technologies and challenges, committed to proving abilities through dedicated, responsible, and impactful contributions.

SKILLS

Frontend : HTML, CSS, Tailwind CSS, JavaScript, ES6, React.js, Next.js, and React Router.
Backend : Node.js, Express.js, MongoDB.
Others : Axios, TanStack Query, Stripe, Firebase Authentication, JWT.
Tools : Git, GitHub, VS Code, Chrome DevTools, Netlify, Vercel, Firebase.

PROJECTS

1. Bari Bazaar   **Live Website**

A real estate platform with role-based dashboards for admins, agents, and users to manage properties, offers, and payments efficiently.

• Agents add properties verified by admins before display, while admins manage all platform activities.
• Users can view property details, make offers, pay securely via Stripe, and utilize search and sorting features.
• Secure role-based routing with backend API protection, dynamic dashboards summarizing activities.
• *Credentials***:** Admin- Email**:** admin@admin.com, Pass**:** #Aa1234; Agent- Email**:** agent@agent.com, Pass**:** #Aa1234

Tech Stack: Tailwind CSS, React, Node.js, Express.js, MongoDB, Cloudinary, Firebase Authentication.

2. MS Marathon   **Live Website** | **Github Client** | **Github Server**

A comprehensive platform that streamlines marathon event management for organizers and ensures a smooth registration experience for participants.

• Organizers can create, update, delete marathons, and view registered participants efficiently.
• Participants register for marathons with automatic closure after deadlines.
• Secure login implemented using Firebase Authentication with token-protected routes.

Tech Stack: Tailwind CSS, DaisyUI, React, Node.js, Express.js, MongoDB, Firebase Authentication.

3. Pran Rokto   **Live Website** | **Github Client** | **Github Server**

A blood donation platform connecting donors with recipients through easy search and filtering by blood groups.

• Displays detailed donor listings with blood group, location, and contact information for quick access.
• Enables filtering donors by blood group and location to find matches efficiently.
• Responsive design ensures seamless use on all devices with a clean, user-friendly interface.

Tech Stack: Tailwind CSS, React, Node.js, Express.js, MongoDB, JWT, Multer + Cloudinary.
